

TISAX® approval

The ENX Association supports with TISAX® (Trusted Information Security Assessment Exchange) on behalf of VDA the common acceptance of Information Security Assessments in the automotive industry. The TISAX Assessments are conducted by accredited audit providers that demonstrate their qualification at regular intervals. TISAX and TISAX results are not intended for general public.

The RONAL GROUP highly values the confidentiality, availability and integrity of information. We've taken comprehensive information security measures and established a group-wide information security management system based on the VDA Information Security Assessment (VDA ISA) catalog of questions, among others. The group assessment was carried out by TISAX testing service provider TÜV Rheinland i-sec GmbH, DE-51105 Cologne.

The results are only available in the ENX Portal under the scopes:

- [SOLCXH](#) – High protection requirements with prototype components
- [SVCNTP](#) – High protection requirements
