Review Summary / Statement

The following review report is based on the report with the review report number: CF-2021-07-21251729, in which the entire study was reviewed for standard accordance with DIN EN ISO 14067:2019. The present critical review relates exclusively to the calculations for the 2020/21 financial year and the changes to the 2019/20 financial year (basis for initial considerations).

According to the international standard DIN EN ISO 14067: 2019, a critical review was carried out ("Critical Review") for the Product Carbon Footprint Study for the RONAL GROUP. The review process by TÜV Rheinland took place after the study was prepared. RONAL GROUP has determined its climate-relevant greenhouse gas emissions for the product: Aftermarket wheel RONAL R70-blue and the results are summarized and presented in the form of a report.

It was determined, that the collection of the data and the calculation of the climate-relevant emissions (CO₂ equivalents) are scientifically based and represent the state of technology. The results are conclusive and serve as the basis for the output of greenhouse gases from the named RONAL GROUP product ("Cradle to Gate"). The data used fulfill the goal and scope of the study. The presentation of the results is comprehensible. The study presented and the report are coherent, transparent and represent the aim and scope of the study.
